Artificial Intelligence · Model security

Anthropic moves to stop rivals from copying Claude

New safeguards against "distillation" cut the data that can be extracted from the model by 90% to 99% in the company's own tests

By Coffee & ADHD · AI desk

Distillation is the shortcut of the AI race: instead of training a model from scratch, you ask a stronger one millions of questions and train a cheaper model on its answers. Anthropic says it has now built defenses aimed squarely at that practice, and that in internal testing they reduced extractable data by between 90% and 99%. (AIdapted)

The announcement lands in a week when frontier labs are fighting on every front at once. Meta introduced Muse Wonder and Muse Wonder Full, the opening models of a new generation meant to compete head-on with OpenAI, Google and Anthropic. (AIdapted)

Meanwhile the business side keeps accelerating. IT services giant HCLTech signed a global partnership with Anthropic to push agentic AI into enterprises, with a dedicated business unit, a center of excellence and Claude and Claude Code built into its offerings. (AIdapted)

"Distillation is the shortcut of the AI race."

Security also turned physical: a former OpenAI engineer was charged after a hidden recording device was found in an executive meeting room. The company says no model weights, source code or customer data were accessed. (Fox News)

The week in model launches

Oct 7	**Anthropic**	Claude Haiku 5.5, a fast, low-cost small model
Oct 8	**Anthropic**	Claude Dashboards and Motion in beta
Oct 12	**Meta**	Muse Wonder and Muse Wonder Full

Money & Chips

Macro

The IMF flags the AI boom's soft spots

AI investment is propping up global growth, the IMF says, but it lists the risks: stretched tech valuations, financing costs, geopolitics and cybersecurity. (AIdapted)

Compute · Europe

Scaleway heads north for GPUs

The French cloud provider plans a new AI computing system in Sweden built on AMD Instinct MI355X accelerators, aimed at European startups and businesses. (AIdapted)

Cybersecurity

Big firms put Claude Mythos on defense

Anthropic shared how Comcast and Booz Allen are using Claude Mythos for security work. (Releasebot)

Markets

Inflation data hits tech stocks

A hotter-than-expected US CPI print (3.7% a year) revived bets on higher rates. The Nasdaq fell 1.88% on the day. (InfoMoney)

AI in Brief

- **Apple Intelligence in China.** Apple is preparing to debut its first AI features in the country in December. *(Bloomberg)*
- **A screen for the kitchen.** Apple's HomeView mixes entertainment, video calls and smart-home control with Siri and Apple Intelligence, from US$ 299. *(AIdapted)*
- **AI for architects.** Blueprints turns sketches or PDFs into permit-ready architectural documents and updates them when requirements change. *(AIdapted)*
- **AI for PR.** Honeyjar drafts announcements, finds journalists and monitors coverage for teams without a comms department. *(AIdapted)*
- **Out of beta.** Claude's Docs, Slides and Design are now available on every plan, including Free. *(Releasebot)*
- **Gemini goes to work.** Google Cloud unveiled a unified Gemini agent for the workplace. *(CNBC)*
- **Free year for startups.** Anthropic is giving startups a year of Claude Team plus US$ 1,000 in credits. *(TechCrunch)*

Continued on page 2: agents, policy and tools

Agents at Work

Enterprise

The agent war moves into the office suite

Google Cloud introduced a unified Gemini agent for work, pitched as a single assistant that can act across documents, email and business apps. It is the latest sign that the fight among the big platforms has shifted from chatbots to agents that actually do tasks. (CNBC)

Anthropic, for its part, opened Claude for Google Workspace in public beta, bringing its assistant into the same office apps Google is targeting. (Releasebot)

Security

"Protecting AI is a counterintelligence priority"

In the OpenAI recording-device case, the FBI said the device was meant to capture sensitive conversations about the company's superintelligence work. OpenAI found it during a routine security sweep and called the bureau. (Fox News)

Defense tech

Autonomous weather balloons land an Air Force deal

WindBorne Systems, which flies autonomous weather balloons, is linked to a US Air Force contract worth up to nearly US$ 49 million. The ceiling is not a guaranteed payment. (AIdapted)

How this paper is made ❧ in 5 steps

Step	What happens
1. Setup	**Five questions**: language, where your profile comes from (Claude, Codex/ChatGPT or another LLM), interests, delivery, routine.
2. Report	**Parallel web searches**, only facts from the last 24–48 h, one source per item.
3. Lay out	**Broadsheet template** with hyphenation and an overflow check per column.
4. Deliver	**PDF saved** to your folder, and optionally sent to your printer.
5. Repeat	**Daily routine** via the app's scheduler, cron or launchd.

Policy

Macro risk

Valuations under the microscope

The IMF's latest outlook credits AI spending for part of global growth while warning that high valuations and financing costs could turn a boom into a correction. (AIdapted)

China

Apple's long road to AI approval

The December launch comes after a long approval process: regulators cleared Apple's generative AI in July, with Alibaba and Baidu as local partners. (Bloomberg)

This reader's setup

Language	English
Profile	Claude memory
Fixed	AI models, agents
Rotating	Chips, policy
Delivery	PDF + printer
Routine	Daily, 06:45

✦ ✦ ✦

Talent

Startups get a cheaper on-ramp

Anthropic's startup offer bundles a free year of Claude Team with US$ 1,000 in token credits. (TechCrunch)

Tools to Try

Small models

Claude Haiku 5.5

Anthropic's new fast, low-cost small model, launched on October 7. (Releasebot)

Dashboards

Claude Dashboards, in beta

Launched in beta on October 8, alongside Claude Motion. (Releasebot)

Glossary

Distillation: training a smaller model on a bigger model's answers.

Agent: an AI that takes actions in apps, not just answers questions.

Small model: a cheaper, faster model for simple, high-volume tasks.
